Answering phone calls, scheduling appointments, billing and insurance claims.

Harmony School of Endeavor/ Rocketry Club and Robotics

Sept 2018 - May 2019, Austin, TX

Participated in the construction of rockets and attended launches to test their flight time and height. I also participated in robotics building robots out of legos and programming them to perform certain tasks.

Top Projects

[Presidential Race](#) | [Github](#)

Presidential Race is a small video game created in **Unity**, programmed using **C#**, implemented and launched inside a **ReactJS** web application. As a team member, I contributed the contents of the game.

[UI Folly](#) | [Github](#)

UI Folly is a mini game created with **react js** in which the player must click from a grid of cards on the screen that will shuffle after each click. Clicking the same card twice will result in a loss.

In my free time I enjoy welding, biking, game development on Unity, and tinkering with code on Chrome web tools and old games.
